

兔抗 H2BC3 多克隆抗体

- 中文名称：兔抗 H2BC3 多克隆抗体
- 英文名称：Anti-H2BC3 rabbit polyclonal antibody
- 别名：H2B clustered histone 3; H2B.1; H2B/f; H2BFF; HIST
- 相关类别：一抗
- 储存：冷冻（-20℃）避光
- 宿主：Rabbit
- 抗原：H2BC3
- 反应种属：Human, Mouse, Rat, Chicken, Dog, Pig, Cow, Horse, Rabbit
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

技术规格

WB Recommended dilution:	100-500
IHC Recommend dilution:	10-50
SwissProt:	P33778
Synonyms:	H2B.1; H2B/f; H2BFF; HIST1H2BB
Full name:	H2B clustered histone 3
Immunogen:	KLH conjugated synthetic peptide derived from human H2 BC3
Name of antibody:	H2BC3
Applications:	ELISA, WB, IHC
Back ground:	Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Nucleosomes consist of approximately 146 bp of DNA wrapped around a histone octamer composed of pa

irs of each of the four core histones (H2A, H2B, H3, and H4). The chromatin fiber is further compacted through the interaction of a linker histone, H1, with the DNA between the nucleosomes to form higher order chromatin structures. This gene is intronless and encodes a replication-dependent histone that is a member of the histone H2B family. Transcripts from this gene lack polyA tails; instead, they contain a palindromic termination element. This gene is found in the large histone gene cluster on chromosome 6p22-p21.3.
