

EFNA3 抗原(重组蛋白)

- 中文名称: EFNA3 抗原 (重组蛋白)
- 英文名称: EFNA3 Antigen (Recombinant Protein)
- 储存: 冷冻(-20℃)
- 相关类别: 抗原

概述

Fusion protein corresponding to a region derived from 23-214 amino acids of human EFNA3

技术规格

Full name:	ephrin-A3
Synonyms:	EFL2, EPLG3, LERK3, Ehk1-L
Swissprot:	P52797
Gene Accession:	BC110406
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	This gene encodes a member of the ephrin (EPH) family. The eph rins and EPH-related receptors comprise the largest subfamily of r eceptor protein-tyrosine kinases and have been implicated in medi ating developmental events, especially in the nervous system and in erythropoiesis. Based on their structures and sequence relations hips, ephrins are divided into the ephrin-A (EFNA) class, which are anchored to the membrane by a glycosylphosphatidylinositol linka ge, and the ephrin-B (EFNB) class, which are transmembrane prote ins. This gene encodes an EFNA class ephrin.
