技术规格

Background:	This gene is a member of the connexin gene family. The encoded protein is a component of gap junctions, which are composed of arrays of intercellular channels that provide a route for the diffusion of low molecular weight materials from cell to cell. Mutations in this gene may be associated with atrial fibrillation. Alternatively spliced transcript variants encoding the same isoform have been described.
Applications:	ELISA, IHC
Name of antibody:	GJA5
Immunogen:	Fusion protein of human GJA5
Full name:	gap junction protein alpha 5
Synonyms:	CX40; ATFB11
SwissProt:	P36382

ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer and human gastric cancer
IHC Recommend dilution:	30-150
