

## BCL6B 抗原(重组蛋白)

- 中文名称: BCL6B 抗原 (重组蛋白)
- 英文名称: BCL6B Antigen (Recombinant Protein)
- 别 名: B-cell CLL/lymphoma 6B; BAZF; ZNF62; ZBTB28
- 相关类别: 抗原
- 储 存: 冷冻 (-20℃)

## 概述

Fusion protein corresponding to a region derived from 280-479 amino acids of human BCL6B

## 技术规格

Full name:	B-cell CLL/lymphoma 6B
Synonyms:	BAZF; ZNF62; ZBTB28
Swissprot:	Q8N143
Gene Accession:	BC059404
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Bcl-6, a transcriptional repressor, binds Stat recognition-like DNA e lements and influences germinal center development and cell diffe rentiation. Additionally, Bcl-6 negatively regulates NF?B expression, thereby inhibiting NF?B-mediated cellular functions. Bcl-6b (B-cell CLL/lymphoma 6, member B), also known as ZNF62, BAZF or ZBTB 28, is a 480 amino acid nuclear protein that contains one BTB (PO Z) domain and five C2H2-type zinc fingers. Expressed ubiquitously with highest expression in placenta and heart, Bcl-6b associates wi th Bcl-6 and functions as a sequence-specific transcriptional repres sor that is thought to be necessary for early B-cell development. T

he gene encoding Bcl-6b maps to human chromosome 17, which comprises over 2.5% of the human genome and encodes over 1,2 00 genes.
